The Continuity Logic Platform is the world's first adaptive, zero-code integrated risk management platform. By using the Continuity Logic Platform, organizations can build highly configurable integrated risk applications that connect people, business process, technology, vendors, facilities, organization structure, and operational and regulatory data in weeks rather than months and years. Continuity Logic dramatically reduces the cost and time to operate and change business continuity, GRC, and vendor risk programs and delivers strategic information in real-time to organizational leaders and front-line workers so they can make better decisions.

DRJ DIRECTORY

Disaster Recover Journal publishes five directories per year on a variety of business continuity topics. Our policy is to only edit the information to meet our guidelines. We neither evaluate nor rate any of the participating vendors' products or services. Our goal is to maintain an independent view while sharing information to assist our readers in making successful, well-informed decisions. Contact the vendor directly for further information on any product or service listed in one of our directories. Vendors who would like to be included in future directories should contact Laura Wilfong at laura@drj.com.
