www.AgilityRecovery.com

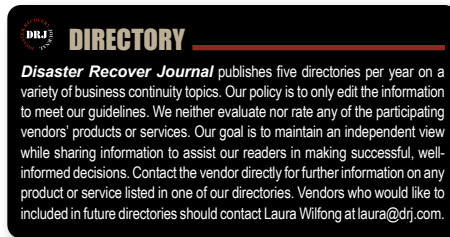

info@agilityrecovery.com

Agility Recovery is a premier providers of business resilience and workplace recovery solutions

to organizations of all types. Since 1989, Agility has rescued thousands of organizations with an unprecedented success rate. We provide

easy-to-implement recovery solutions for an affordable monthly membership fee. Should an interruption occur, we immediately begin mobilizing personnel and assets from hundreds of distribution locations across North America. Unlike other programs, Agility has not, and never will profit from a customer's disaster. The Agility solution includes:

1. Power – Emergency Generators and fuel;
2. Computer Systems – IT & Office equipment stocked for express delivery;
3. Office Space – Numerous options, including mobile offices and Class A space, including all typical office furnishings;
4. Communications – Satellite or wireless connectivity to restore phone and Internet service.

Bluelock Solutions

Alicia Gaba

16401 Swingley Ridge Road, Suite 500

Chesterfield, MO 63017

888-402-2583

www.bluelock.com

email@bluelock.com

Bluelock, an InterVision solution, provides Disaster Recovery as a Service (DRaaS) for complex environments and sensitive

data to help companies mitigate risk with confidence.

Bluelock DRaaS is the solution midsize organizations turn to for highly resilient cloud services because of its

ability to support unique requirements. Its exclusive program, Bluelock Recovery Assurance gives clients complete confidence their disaster recovery solution will be uncompromisingly secure, expertly tailored, thoroughly supported and comprehensively tested. With data centers in the US, Bluelock supports a wide range of compliance frameworks and is SOC 2 audited. In March of 2018, Bluelock was acquired by InterVision Systems. Charlotte, NC 28273

877-448-9378

www.flexential.com

sales@flexential.com

Flexential helps organizations safeguard the integrity of their IT infrastructure, applications and data against disaster. Our DR services include planning, consulting, design, management and support for successful recovery efforts based on your unique infrastructure, application set and business requirements. Leverage our 41 data centers for colocation-based DR. Or, choose from our Recovery Cloud (DRaaS) tiers and use controls such as DR test frequency, infrastructure size and performance to align your workloads. Contact Flexential today to build the exact solution your business requires and your budget allows.

Hewlett Packard Enterprise

DEC-Inbound@hpe.com

Hewlett Packard Enterprise (HPE) has been in business since 1939, and has been in the continuity services business since 1984. Hewlett-Packard Enterprise has several hundred business continuity planners worldwide, the majority of whom

2018 IT Service Directory

are certified. HPE manages 42 recovery centers across 21 countries and has managed more than 850 invocations with 100 percent success rate. HPE provides comprehensive business continuity consulting and program management services tailored to each customer's requirements. HPE's methodology is based upon industry standards as well as HPE's best practices, addressing both business and technical requirements. HPE also provides collaborative consultation, mentoring and training for customer staff wishing to maximize use of their own staff. The company has been involved with or completed more than 1,500 business continuity plans in a wide array of industries as well as for government entities. Consultants use HPE developed tools, as well as commercially available planning software packages if preferred. HPE provides either fixed price or time and expenses consulting. The hourly fees vary depending on the skill and experience needed.

Veritas

500 E. Middlefield Rd
Mountain View, CA 94043
(866) 837-4827

www.veritas.com

The exponential growth of data and the resources needed to manage it is one of the most pressing issues facing business today. And it's not just the amount of data. It's where it lives and how it travels between private clouds, public clouds and back to on premises. In these increasingly complex IT environments, it's important to focus on what's constant: the data. Every one of our information management solutions – from business continuity to back up and recovery to software defined storage and information governance – is designed around the principle that information is more important than infrastructure. Veritas has the privilege to help the world's organizations – including 86% of the global Fortune 500 – collect, protect, analyze and optimize their data, even in the most demanding environments.
