joachim.mayer@hp.com
 HP has been in business since 1939, and has been in the continuity services business since 1984. Hewlett-Packard has several hundred business continuity planners worldwide, the majority of whom are certified. HP manages 42 recovery centers across 21 countries and has managed more than 850 invocations with 100 percent success rate. HP provides comprehensive business continuity consulting and program management services tailored to each customer's requirements. HP's methodology is based upon industry standards as well as HP's

 A small graphic with the word "DIRECTORY" in a bold, sans-serif font. Below it is a paragraph of text: "Disaster Recover Journal publishes five directories per year on a variety of business continuity topics. Our policy is to edit the directory information to meet our guidelines. We neither evaluate nor rate any of the participating vendors' products or services. Our goal is to maintain an independent view while sharing information to assist our readers in making successful, well-informed decisions. Contact the vendor directly for further information on any product or service listed in one of our directories."

best practices, addressing both business and technical requirements. HP also provides collaborative consultation, mentoring and training for customer staff wishing to maximize use of their own staff. The company has been involved with or completed more than 1,500 business continuity plans in a wide array of industries as well as for government entities. Consultants use HP developed tools, as well as commercially available planning software packages if preferred. HP provides either fixed price or time and expenses consulting. The hourly fees vary depending on the skill and experience needed.

IBM
