Hewlett Packard Enterprise

DEC-Inbound@hpe.com

Hewlett Packard Enterprise (HPE) has been in business since 1939, and has been in the continuity services business since 1984. Hewlett-Packard Enterprise has several hundred business continuity planners worldwide, the majority of whom are certified. HPE manages 42 recovery centers across 21 countries and has managed more than 850 invocations with 100 percent success rate. HPE provides comprehensive business continuity consulting and program management services tailored to each customer's requirements. HPE's methodology is based upon industry standards as well as HPE's best practices, addressing both business and technical requirements. HPE also provides collaborative consultation, mentoring and training for customer staff wishing to maximize use of their own staff. The company has been involved with or completed more than 1,500 business continuity plans in a wide array of industries as well as for government entities. Consultants use HPE developed tools, as well as commercially available planning software packages if preferred. HPE provides either fixed price or time and expenses consulting. The hourly fees vary depending on the skill and experience needed.

IBM Resiliency Services

LaShanda Willins
1177 S Belt Line Rd.
Dallas, TX 75019-4642
(972) 906-3151

www.ibm.com/services/resiliency
lwillin@us.ibm.com

IBM Resiliency Services helps clients develop enterprise-wide business continuity and disaster recovery strategies to address the risks and opportunities

of today's business environment which requires near-continuous operations. For nearly 50 years, IBM has helped organizations of all sizes and in every industry stay always-on and ready for business. Today, IBM is the market leader in disaster recovery, protecting over 10,000 clients, and our as-a-service solutions make recovering from a disruption fast and seamless, no matter where their workload is located (private/public/traditional) – while ensuring full compliance with federal and local data residency regulations. Don't let your current plan leave you vulnerable.

iLand

Kellie Willman

Headquarters

1235 North Loop West Suite 800

Houston, TX 77008

(832) 699.0387

<http://www.iland.com>

With data centers in the U.S., U.K. and Singapore, iLand delivers proven enterprise cloud solutions that help companies do business faster, smarter and more flexibly. Unlike any other provider, iLand's technology and consultative approach mean anyone—regardless of expertise, location or business objective—can experience the benefits of a hassle-free cloud. From scaling production workloads, to supporting testing and development, to disaster recovery, iLand's secure cloud and decades of experience translate into unmatched service. Underscoring the strength of its platform, the company has been recognized as VMware's Service Provider Partner of the Year, Global and Americas. Its Enterprise Cloud Services portal, which was a 2014 Best of Interop finalist, gives customers the transparency needed to minimize the unpredictable cost, performance and compliance issues that plague many companies today. iLand

has also been ranked as a leader in Forrester Research, Inc.'s report, "The Forrester Wave™: Disaster-Recovery-As-A-Service Providers, Q1 2014." Forrester gave iLand the highest scores possible for its core DRaaS offerings, recovery objective capabilities, platform and application support, data resiliency and risk mitigation, security, value proposition and vision, as well as pricing, service levels and contract terms. For more information on our cloud infrastructure solutions, please visit our website at www.iland.com or give us a call at 800-697-7088 in the USA or +44(0)20.7096.0149 in EMEA.

Peak10

Headquarters

8809 Lenox Pointe Drive Suite G

Charlotte, NC 28273

(866) 473.2510

<http://www.peak10.com>

Amanda.brown@peak10.com

Headquartered in Charlotte, North Carolina, Peak 10 provides tailored, reliable IT infrastructure solutions for mid-market businesses. Customer-centric, secure and cost-effective, Peak 10 solutions are designed to scale and adapt to customers' changing business needs, enabling them to increase agility, lower costs, improve performance and focus internal resources on their core competencies. Included are robust HIPAA- and PCI-compliant cloud solutions that use the infrastructure as a service (IaaS) model, flexible managed colocation options and high-performance connectivity solutions. Peak 10 facilities are strategically located in 10 key U.S. markets, supporting customers around the world. SSAE 16 audited, Peak 10 can help companies meet the requirements of various regulatory compliance acts such as Sarbanes-Oxley (SOX), HIPAA/HITECH, PCI DSS and Gramm-Leach-Bliley (GLBA).

Peak 10 holds Cisco® Cloud Provider Certification with a Cisco Powered Cloud Infrastructure-as-a-Service (IaaS) designation. For more information, visit www.peak10.com.

Veritas

500 E. Middlefield Rd
Mountain View, CA 94043
(866) 837-4827
www.veritas.com

The exponential growth of data and the resources needed to manage it is one of the most pressing issues facing business today. And it's not just the amount of data. It's where it lives and how it travels between private clouds, public clouds and back to on premises. In these increasingly complex IT environments, it's important to focus on what's constant: the data. Every one of our information management solutions – from business continuity to back up and recovery to software defined storage and information governance – is designed around the principle that information is more important than infrastructure. Veritas has the privilege to help the world's organizations – including 86% of the global Fortune 500 – collect, protect, analyze and optimize their data, even in the most demanding environments.
