MegaCryption is a comprehensive cryptographic toolkit that not only encrypts for data confidentiality, but also provides data integrity to assure that data has not been compromised, data authentication to verify the origin of the data, and compression to provide the highest level of performance. By encrypting data with MegaCryption, users can securely FTP encrypted data directly from the z/OS platform into the cloud, to remote sites, business partners, disaster recovery centers, and more.

ryan.hutton@avalution.com

Catalyst is a fully integrated, end-to-end business continuity and IT disaster recovery planning software - unlike any other currently available on the market today. Catalyst is easy to learn and use, enables robust customiza-

tion, and provides the fastest implementation and lowest total cost of ownership. Features: Business Impact Analysis, Risk Assessment, Plan Development, Task Scheduling, Exercising, Live Incident Management, Emergency Notification, Automatic Program Metrics. See the difference first-hand by starting a 30-day free trial or scheduling a demo.

Disaster Recover Journal publishes five directories per year on a variety of business continuity topics. Our policy is to only edit the information to meet our guidelines. We neither evaluate nor rate any of the participating vendors' products or services. Our goal is to maintain an independent view while sharing information to assist our readers in making successful, well-informed decisions. Contact the vendor directly for further information on any product or service listed in one of our directories. Vendors who would like to be included in future directories should contact Laura Wilfong at laura@drj.com.

Business Protector

Anthony Jardim
7545 Irvine Center Dr. #200
Irvine, CA 92618
949-648-7400

www.businessprotector.com
ajardim@metricone.com

Business Protector proves that BCM software does not have to be complex, cumbersome or expensive to provide the full measure of protection your organization requires. It will change your outlook on how a Business Continuity Management System (BCMS) should work. Easy deployment, ease of use, knowledgeable staff, and state of the art functionality provide a highly efficient platform for your BCM program.

Continuity Logic

Tejas Katwala
400 N. Tampa St.
Tampa, FL 33602
866-321-5079

www.continuitylogic.com
clsales@continuitylogic.com

The Continuity Logic Platform is the world's first adaptive, zero-code integrated risk management platform. By using the Continuity Logic Platform, organizations can build highly configurable integrated risk applications that connect people, business process, technology, vendors, facilities, organization structure, and operational and regulatory data in weeks rather than months and years. Continuity Logic dramatically reduces the cost and time to operate and change business continuity, GRC, and vendor risk programs and delivers strategic information in real-time to organizational leaders and front-line works so they can make better decisions.
