Bullhorn enables organizations to quickly and easily connect with its employees when it counts by sending emergency notifications and surveys via email, text message, and voice phone call. Even better, Bullhorn is built into Catalyst, so no third-party contracts are required. Bullhorn includes unlimited communication during an incident and a minimum of two tests per year, making costs predictable. Bullhorn enables organizations to distribute messages and surveys to individual contacts, groups of contacts, or teams, record audio messages for phone calls (rather than using text to speech), and more. Bullhorn messages can be sent at an organizational level or directly from individual plans, which makes small-scale messaging easier to delegate to end users. Explore Bullhorn by visiting bccatalyst.com or requesting a free trial.
