www.AgilityRecovery.com
contactus@agilityrecovery.com

Agility Recovery is a central platform for an entire business continuity process, offering various testing services, unique educational resources to train

and exercise, tools to manage incidents with access to historical data, and workspace recovery. These services are complemented by priority access to temporary power generators, com-

munications equipment, and computer systems. Agility partners with customers to understand their unique business continuity needs and provide tailored recovery services to help them achieve their desired business outcomes. Since 1989, the company has rescued thousands of organizations with unparalleled performance.

An IBM Business Partner since 1987, UCG is one of the largest independent IBM i business partners and has been rated in the top 1% of IBM business partners globally.

Veritas

500 E. Middlefield Rd Mountain View, CA 94043
(866) 837-4827
www.veritas.com
The exponential growth of data and the resources needed to manage it is one of the most pressing issues facing business today. And it's not just the amount of data. It's where it lives and how it travels between private clouds, public clouds and back to on premises. In these increasingly complex IT environments, it's important to focus on what's constant: the data. Every one of our information management solutions – from business continuity to backup and recovery to software defined storage and information governance – is designed around the principle that information is more important than infrastructure. Veritas has the privilege to help the world's organizations – including 86% of the global Fortune 500 – collect, protect, analyze and optimize their data, even in the most demanding environments.
