## Level Set- Guidance: *Definitions*

- ❑ **Threat:** a man-made or natural situation or condition that can cause disruption to an entity's operations or Services (example: impending tornado)
- ❑ **Vulnerability:** the degree to which a person, asset, process, information, infrastructure or other resources are exposed to the actions or effects of a risk, event or other occurrence (no weather proof windows, doors, no generator)
- ❑ **Risk:** a possible event that could cause harm or loss, or affect the ability to achieve objectives (example: systems will be impacted and not function as a result, should the storm makes land fall).
- ❑ **Crisis:** Abnormal and unstable situation that threatens the organizations strategic objectives, reputation or viability.
- ❑ **Incident:** An event which is not part of standard business operations which may impact or interrupt services and, in some cases, may lead to disaster. Situation that might be, or could lead to, a disruption, loss, emergency or crisis.
- ❑ **Business Continuity:** The strategic and tactical capability of the organization to plan for and respond to incidents and business disruptions in order to continue business operations at an acceptable predefined level. The capability of the organization to continue delivery of products or services at acceptable predefined levels following a disruptive incident.

## Opportunities and Challenges: Causes, Symptoms, and Results

Focus Area	Opportunities	Challenges
Artificial Intelligence	Convenience	Are controls appropriate?
Policies, Standards, Procedures	Directional Guidance	Are these being adhered to?
Governance	Clear Ownership and Authority	<u>Is there sponsorship and support?</u> Is the process clear on prioritization of goals and activities?
Regulatory	Reduce risk of non compliance	<u>Are there Broader Systemic Risks?</u>

## Opportunities and Challenges: Causes, Symptoms, and Results- Resulting Risks

- ❑ Tesla Crypt (2016)- Targeted files associated with video games (downloadable)
- ❑ Simple Locker (2015/2016)- Android based attack which encrypted files w/o help of spammers- impacting UI.
- ❑ WannaCry (2017)- Server Message Block (SMB) exploit. Patch was available, but not applied by many.
- ❑ Non Petya (2017)- Seized servers with non consistent updates.
- ❑ SamSam (2018)- Targeted orgs. Organizational focus vs highly technical. Low ransom.
- ❑ Ryuk (2018)- Targeted orgs w/little room for downtime (utilities). Disables restore functions. High ransoms.
