The exponential growth of data and the resources needed to manage it is one of the most pressing issues facing business today. And it's not just the amount of data. It's where it lives and how it travels between private clouds, public clouds and back to on premises. In these increasingly complex IT environments, it's important to focus on what's constant: the data. Every one of our information management solutions – from business continuity to back up and recovery to software defined storage and information governance – is designed around the principle that information is more important than infrastructure. Veritas has the privilege to help the world's organizations – including 86% of the global Fortune 500 – collect, protect, analyze, and optimize their data, even in the most demanding environments.
